TEXTILE, STEEL WORKERS TO SPEED UP PRODUCTION IN HONOR OF CONSTITUTION DAY

TEXTILE WORKERS TO STEP UP OUTPUT -- Budapest, Nepszava, 14 Jun 51

The workers of the Kelenfold Textile Combine pledged to increase their output in honor of Constitution Day.

To make up for past defaults in their quota, the cotton spinners pledged to produce 7,800 kilograms over their fourth-quarter quota, and to save 4,800 kilograms of raw cotton during the third quarter.

The vigogne yarn spinners pledged to produce 7,300 kilograms over their third-quarter quota, and 7,500 kilograms over their fourth-quarter quota.

The cotton weavers pledged to raise third-quarter production from 96 percent to 97.5 percent, and fourth-quarter production to 98.5 percent.

STEEL WORKERS TO EXCEED ANNUAL QUOTA -- Budapest, Szabad Nep, 16 Jun 51

In honor of Constitution Day the workers of the Matyas Rakosi Works steel plant pledged to produce by 20 August 5,732,000 forints' worth of goods in excess of their quota. They also pledged to complete their yearly quota by 15 December, and to save 8,860,000 forints in material and power by the end of the year.

The workers of the sheet-rolling plant pledged to increase monthly production by 25 tons.

The workers of the forge and tempering shops will deliver the steel containers needed in the construction of the Danube Valley Steelworks 2 weeks earlier than promised.

COMPLETE FURNACE BEFORE DEADLINE -- Budapest, Nepszava, 14 Jun 51

٢

Several weeks ago construction was started on a new 40-ton open-hearth furnace at the Matyas Rakosi Works. The Ozd metallurgical workers pledged to complete the necessary iron armatures for the furnace by 5 June instead of 15 June. However, the parts arrived at the Rakosi Works as early as 1 June.

The furnace will be completed on 1 July instead of 1 August, and will start operating on 15 July.

REDUCE BUILDING TIME FOR OPEN-HEARTH FURNACE -- Budapest, Nepszava, 15 Jun 51

Workers of the Diosgyor metallurgical enterprise have started construction of a new open-hearth furnace. Previously it took from 10 to 11 months to complete such a furnace. However, utilizing the methods taught them by Soviet engineers Rakcheyev and Bugylkin during the construction of the No 2 blast engineers Rakcheyev and Bugylkin during the construction of the furnace, the technical managers drew up plans to complete construction of the furnace in 75 days. The workers, in accordance with their pledge to step up production in honor of Constitution Day, prevailed on the technical managers to reduce the building period to 65 days.
